TECHNICAL SKILLS

Languages:	C/C++, Java, Python, JavaScript
Web Development:	HTML, CSS, React.js, Node.js, Express.js, Spring Boot, Bootstrap, Tailwind CSS, Material UI, Redux Toolkit
Tools & Technologies:	Git, GitHub, Postman, Docker, AWS, Render, Google Gemini API, OpenAI API, Solidity, Hardhat, Ethers.js, IPFS
Databases & Concepts:	MySQL, MongoDB, OOP, MVC, Microservices, Chrome Extension Development

EXPERIENCE

AI/ML Intern	Jun 2025 – Aug-2025
Airnd Labs	Remote

Project: Deep Learning Framework for Diabetic Retinopathy Detection

- Developed hybrid CNN–Transformer models using EfficientNet, ResNet18, and Swin Transformer for diabetic retinopathy severity classification on the APTOS 2019 dataset.
- Improved model performance through Mixup augmentation, SMOTE, Weighted Cross-Entropy, and Optuna-based hyperparameter optimization, achieving **86% validation accuracy**.
- Built the training pipeline in PyTorch and evaluated models using Accuracy, ROC-AUC, Grad-CAM, and LIME for performance and interpretability.

PROJECTS

Full Stack Job Portal Application — MERN Stack

- Developed a full-stack job portal using MongoDB, Express.js, React.js and Node.js with JWT authentication and role-based access for recruiters and job seekers.
- Built RESTful APIs for job posting, search, application tracking and recruiter dashboard.
- Designed responsive React UI with reusable components and efficient state management.

AI-Powered Email Writer Assistant — Spring Boot, React, Gemini API

- Developed an AI-powered email assistant that generates context-aware and professional email replies using Google Gemini API.
- Built a Chrome Extension that integrates directly with Gmail, enabling real-time AI-generated email suggestions.
- Designed a modern, responsive user interface using React (Vite) and Bootstrap for efficient email drafting and editing.
- Developed secure backend APIs using Spring Boot to process prompts and communicate with the Gemini API.

Decentralized File Storage System — React.js, Solidity, Hardhat, Web3.js, IPFS

- Developed a decentralized file storage application using React, Solidity, Hardhat, Web3.js, and IPFS (Pinata) for secure blockchain-based file management.
- Implemented smart contracts for file ownership, wallet-based authentication, and allowlist-based file sharing with configurable access control.
- Integrated MetaMask for secure user authentication and seamless interaction with Ethereum smart contracts.

AI-Based Code Reviewer — React, Node.js, Gemini API

- Developed an AI-powered code review platform that analyzes source code and provides real-time debugging, optimization, and best-practice recommendations.
- Integrated Google Gemini API to detect logical errors, improve code quality, and suggest optimizations across multiple programming languages.
- Built a responsive React frontend with a Node.js backend for efficient API communication and scalable code evaluation.
- Automated the code review workflow, improving developer productivity through intelligent AI-generated feedback.

CERTIFICATIONS

Data Science for Engineers, NPTEL	Jul–Sep 2024
Introduction to Machine Learning, NPTEL	Jul–Sep 2025
Deep Learning, NPTEL	Jul–Oct 2025
Data Science and Machine Learning, YBI Foundation	2025
Data Science Bootcamp, GeeksforGeeks	2025

Positions of Responsibility

Training and Placement Coordinator	2026–Present
WordPress Coordinator	2026–Present
Technical Head, GDG	2025

EDUCATION

Govt. Mahila Engineering College, Ajmer, Rajasthan	Sep 2023 – Mar 2027
B.Tech in Computer Science & Engineering, CGPA: 9.2/10	
St. Karen's High School, Patna	2021 – 2023
Class XII (CBSE): 85%	
Class X (CBSE): 91%
